PARTITIONING SYSTEMS

WOV-N-WIRE™ PARTITIONS

Wov-N-Wire partitions are the traditional enclosure system specified by architects and contractors. The tough steel wire is woven to create a durable, high-quality partitioning system.

Quality Construction - 10 gauge steel wire, woven into an extremely strong 1-1/2" diamond mesh. Frames, posts and components are all steel.

Economical - We welcome cost and quality comparisons with other woven wire systems.

Modular - Component system makes it easy to design a partition of any size. Components bolt together quickly. Easily relocated. Stackable up to 25 feet in height.

Maintenance-Free - Long-lasting, maintenance-free gray enamel finish.

Also available: Numerous door and lock options, extra-high partitions, ceiling panels, support brackets and stiffening bar. Colors available.

WOV-N-WIRE™ OPTIONS:

Wov-N-Wire doors are pre-hung and available in hinged, sliding and dutch styles, in a variety of sizes. Frames are all-steel and designed to withstand years of heavy traffic.

All doors include a built-in cylinder lock or padlock hasp. The lock is keyed different (KD). Options: keyed alike cylinders (KA), double cylinders (DC),

ADA-compliant locks, push button locks, and electric strike/card reader style locks. Also available: crash/panic bars, spring hinges and automatic closers.

PARTITIONING SYSTEMS

QWIK-FENCE® PARTITIONS

Durable, attractive and easily installed in any space, Qwik-Fence is also our most economical partitioning system. Installs in 25% less time than conventional partitioning systems.

Heavy Duty Construction - Our patented process secures thick 8 gauge galvanized steel wire in a rectangular pattern that is securely welded at each intersection. The process creates more than 500 welds in a nominal 48" by 96" panel. Posts and doors are all-steel and completely galvanized.

Maintenance-Free - Galvanized finish is rust- and corrosion-resistant.

Modular - Component system makes planning and installing easy in any space. Qwik-Fence can be trimmed in the field to accommodate changes or space irregularities. Easily relocated. Stackable up to 45 feet in height.

Also available: numerous door and lock options, extra-high partitions, ceiling panels, support brackets, stiffening bar and colors.

CELLGARD™ II MACHINE GUARDING

Provides all robotic cell and machine perimeter guarding needs – lasting durability, versatility, and meets or exceeds OSHA and ANSI specifications.

Solid Construction - Panels are made of tough 8 gauge welded wire mesh, framed with 1-1/2" x 1/4" steel angles. Posts are 2" x 2" x 14 gauge steel. Powder coated. Cylinder lock included.

Versatile - Modular posts and panels are easy to specify and install. Can be quickly knocked-down and re-configured to suit changes in facility layout.

Also Available - Numerous door, lock options, weld curtain inserts and custom sizes.

Because of the unique pin and bracket design, panels can be freely positioned from 0-180 degrees, allowing whatever configuration a facility demands, as well as providing better space utilization.

QWIK-FENCE® OPTIONS:

Qwik-Fence doors are pre-hung and available in hinged, sliding and dutch styles, in a variety of sizes. Frames are all-steel and designed to withstand years of heavy traffic.

All doors include a built-in cylinder lock or padlock hasp. The lock is keyed different (KD). Options: keyed alike cylinders (KA), double cylinders (DC),

ADA-compliant locks, push button locks, and electric strike/card reader style locks. Also available: crash/panic bars, spring hinges and automatic closers.

PARTITIONING SYSTEMS

SAF-T-FENCE™ PARTITIONS

Saf-T-Fence partitioning provides an extra measure of structural strength and smaller mesh openings for increased security.

Construction Details - Panels are built on a tough 1-1/2", 14 gauge carbon steel frame. The 8 gauge wire mesh is securely welded at each intersection creating 1-1/2" square openings. The heavy-duty steel frames and tight mesh of welded wire provide extra security and structural integrity.

Modular - Component system makes planning and installing easy in any space. Easily relocated. Stackable up to 45 feet in height.

Maintenance-Free - Saf-T-Fence posts are galvanized; other components have one coat of durable grey gloss enamel. Colors available.

Saf-T-Fence's tough steel frames and tight mesh of welded wire provide extra security and durability.

SAF-T-FENCE™ OPTIONS:

Saf-T-Fence doors are pre-hung and available in hinged, sliding and dutch styles, in a variety of sizes. Frames are all-steel and designed to withstand years of heavy traffic.

All doors include a built-in cylinder lock or padlock hasp. The lock is keyed different (KD). Options: keyed alike cylinders (KA), double cylinders (DC),

ADA-compliant locks, push button locks, and electric strike/card reader style locks. Also available: crash/panic bars, spring hinges and automatic closers.

STORAGE SYSTEMS

STOR-MORE® BULK STORAGE LOCKERS

All-steel Stor-More Bulk Storage Lockers provide sturdy, secure storage for apartment tenants and businesses. Heavy duty construction ensures years of maintenance-free performance. Stor-More lockers won't sag, lean or buckle. Modular design makes Stor-More lockers easy to plan, install and relocate.

High Quality Material - Choose from two heavy duty grades: Industrial or Commercial welded wire and expanded metal in either galvanized or grey enamel finish. Colors available.

Bulk Storage Lockers are available in two durable grades: welded wire (left); and expanded metal (right).

Single, Double or Triple Tier - Lockers are available in single, double and triple tier configurations, and can be combined. Begin with a Starter Unit and complete a row with Add-On units.

Safe and Secure Doors - All doors feature secure locking mechanisms. Other anti-theft features available such as top, bottom and backs.

Easy to Install - Component panels are pre-punched and slotted for easy planning, assembly and relocation with standard hand tools. Units bolt to wall or floor.

STOR-MORE® VISIBILITY LOCKERS

Our sturdy Stor-More Visibility Lockers provide secure but visible storage for equipment, tools and other valuable items.

Solid Construction - Sides and door are made of tough 8 gauge galvanized welded wire, with 1-1/2" x 3" spacing. Roof, back and bottom panels made from 22 gauge galvanized sheet metal. Colors available.

Secure - Full-height door features Drop-N-Lock™ two point locking with a concealed drop rod and padlock hasp.

Available in five sizes, (WxDxH):

18" x 18" x 72" with 5 shelves
18" x 36" x 72" with 5 shelves
24" x 36" x 72" with 5 shelves
30" x 30" x 80" with 3 shelves
36" x 36" x 80" with 3 shelves

STORAGE SYSTEMS

SAF-T-STOR™ CABINETS

Extra tough Saf-T-Stor cabinets provide an efficient storage solution for propane tanks while protecting them from damage and theft. Saf-T-Stor cabinets exceed OSHA 1910.110 and NFP 58-79 requirements.

Heavy Duty - Extra thick 8 gauge galvanized wire welded at each intersection. Roof is sturdy 12 gauge galvanized steel. Frames are 1-1/2" x 3" square angle galvanized steel. Sturdy padlock hasp is standard. Colors available.

Resists Corrosion and Rust - All material is galvanized steel to stand up to harsh indoor and outdoor environments.

Easy Assembly - Components are slotted for easy assembly with common hand tools.

Variety of Saf-T-Stor models provide horizontal, vertical or a combination of storage configurations. Saf-T-Stor™ Combo shown.

COLOR OPTIONS All Folding Guard products can be ordered with a durable powder coating finish in a wide range of colors, including specialty colors. The standard maintenance-free finish is galvanized steel on our welded wire products; and grey enamel on our expanded metal products. For lead time consult factory.

STOR-MORE® DISPATCHER LOCKERS

Stor-More Dispatcher Lockers feature individually locked compartments making them well-suited for a variety of operations, especially where service employees need to pick up daily work orders and equipment.

Expandable - Basic unit has three storage compartments, with three separate doors with padlock hasps. Additional units are easily connected via pre-punched holes. Optional rear door for loading material from behind.

Quality Construction - 13 gauge steel mesh sides and doors. All-steel, heavy duty frames and galvanized shelves. Securely bolts to the floor. Tough grey enamel finish. Colors available.

Sturdy Doors - Doors are equipped with steel pin butt hinges to withstand years of heavy use.

Easy Assembly - Pre-punched components for easy assembly.

STORAGE SYSTEMS

LOSS PREVENTION SECURITY CABINETS

Stand-alone Loss Prevention Security Cabinets secure your small- to medium-sized products where they are stored on the sales floor, in the back room, or in the receiving area.

All-Steel Construction - Made from sturdy 8 gauge galvanized welded wire mesh panels on a 2" x 2" frame made of 14 gauge galvanized steel. Hinged doors include a built-in cylinder lock. Optional shelf available in 4 gauge galvanized welded wire, or 20 gauge galvanized steel panel. Colors available.

Secure But Open - Open mesh design allows for a quick visual inspection and will not deter sprinkler systems.

Standard Sizes - Cabinets come in widths of 48" (single door) or 96" (double door); and a variety of depths and heights. The 96" model will fit in a standard 96" wide pallet rack.

Easy Assembly - Pre-punched components for easy assembly.

LOSS PREVENTION PALLET RACK SYSTEM

The Loss Prevention Pallet Rack system is designed to secure an existing pallet rack or bulk rack. One or more pallet levels can be secured with others left open. The all-steel enclosure system surrounds the rack and prevents unauthorized access to merchandise or material.

All-Steel Construction - Made from sturdy 8 gauge galvanized welded wire mesh panels on a 2" x 2" frame made of 14 gauge galvanized steel. Hinged doors include a built-in cylinder lock. Colors available.

Standard Sizes - Available in sizes to fit all standard pallet and industrial racks.

Secure But Open - Open mesh design allows for a quick visual inspection and will not deter sprinkler systems.

Sliding Doors - Industrial grade, bi-parting sliding doors meet in the middle at a padlock hasp.

Easy Assembly - Pre-punched rack components are easily assembled.

Loss Prevention Pallet Rack System (far right) and Security Cabinets securely store material while providing quick visual inspection.

STORAGE SYSTEMS

Loss Prevention Shelving components attach easily and securely to existing shelving.

LOSS PREVENTION SHELVING

Loss Prevention Shelving consists of panels and doors that attach to and secure existing bulk and display shelving.

All-Steel Construction - Made from sturdy 8 gauge galvanized welded wire mesh on all-steel frames. Colors available.

Economical - Buy just what you need: doors, side and back panels in various sizes are all sold separately.

Easy Assembly - E-Z mount brackets (included) can be used on most industrial and commercial shelving.

Standard Sizes - Designed for standard 36" and 48" wide shelving units.

Open But Secure - Open mesh design offers quick visual inventory control.

Sturdy Doors - Two types of hinged doors available depending on your access needs: single (removable) and bi-parting pairs (meet in the middle). Bi-parting doors have sturdy pivot pin hinges and a padlock hasp.

CAR LOCKER™

By utilizing available space in a garage, secure organized storage is provided. Welded wire construction provides security while allowing for visual inspection. Mounts to either block or poured concrete walls or ceilings.

Low Maintenance - Long-lasting low maintenance grey enamel finish is standard. Optional powder coated colors available.

Solid Construction - 8 gauge welded wire mesh sides, top, bottom and doors. All-steel, heavy duty 1-1/2" x 1/4" carbon steel frame.

Sliding Doors - Industrial grade, sliding doors equipped with padlock hasp. Hinged doors optional.

Also available - Welded wire back, solid metal top, and solid metal shelf insert. Variety of hanging baskets, slant shelves and hooks. Custom sizes.

THE FOLDING GUARD DIFFERENCE

Great Products

We use quality raw material and uphold high production standards in the creation of every Folding Guard product. And by listening to our customers and studying their needs we continue to create innovative new products.

Outstanding Service

Our sales team is not just there to take orders. They are experts in the fields of wire partitioning and storage, and they are committed to helping our customers find not just a solution, but the right solution.

Free Design Service

We've designed Folding Guard products so that they are easy to plan and install. But if you need help, we offer toll-free assistance with design, planning and installation questions. Professional installation is also available through our dealer network.

We're CAD Equipped

Our design team is trained in CAD design and we maintain the latest versions of software. Architects and contractors can e-mail their plans for fast, accurate turnaround.

Great Value

With all that we offer, we still invite cost comparisons on any product we offer.

Fast Turnaround

We keep a healthy inventory of product on hand to turn around orders as fast as possible. We also have flexible production methods that allow us to respond quickly to a customer's needs.

Nationwide Dealer Network

Our nationwide dealer network is the first point of contact our customers have with us. In addition to having extensive knowledge of our products, dealers can also arrange professional installation.
